

People who use drugs and sell drugs are harming the environment.

People are polluting the environment and their bodies with chemicals and drugs. To stop this we can enforce laws to prevent young people from using drugs.

We can put people who use drugs in rehab to help them stop.

## **HEALTH/ENVIRONMENT**

People are being affected by air pollution and contaminated water in certain parts of the world.

There should be less global warming and more supportive people to help protect the environment.

People should be more cautious to the things that they do to harm the environment. To help the situation people can stop littering and start recycling.
